

# KING'S COLLEGE

## WILKES-BARRE, PENNSYLVANIA

## Computers and Information Systems

**G**lobal business technology has as its foundation in the support of professionals who form the information systems (IS) field. From webinars to databases and cloud technology, this infrastructure is designed and supported by professionals in the information systems field. Information systems keep businesses running efficiently and securely while also providing a competitive edge. IS professionals design solutions to businesses' most daunting challenges and lead the way for change.

There are thousands of career opportunities for those who can design and secure a networked system or analyze a business requirement and design an improved work flow or think critically to solve technology problems facing businesses today. These careers range from Systems and Database Analysts to IS managers and network administrators to security specialists.

### Computers & Information Systems at King's College

King's provides students not only with strong technical skills but also the cognitive tools that allow students to apply their knowledge to solve the technical problems that are faced by businesses today. The skills and knowledge learned in the Computers and Information Systems (CIS) department are all enriched by the Core liberal arts curriculum and moral foundation taught at King's. Students will graduate with interpersonal skills as well

as their technical skills.

The Computers and Information Systems Department offers a quality liberal arts education that directly supports the mission of King's College by preparing students for a successful career in the Information Systems profession and by instilling the knowledge, experiences, and core values required for continued professional development and lifelong learning.

With the addition of the SAP University Alliance program at King's College our students are provided with hands-on opportunities to work with large databases and solve real world problems with actual ERP software. Additionally, they are networked with SAP partners who can provide internship and career opportunities. SAP UA is SAP (Systems, Applications, and Products in Data Processing ) University Alliance, a

leading global company in the Enterprise Resource Planning (ERP) arena and provides a link between business and learning.

### Job & Graduate School Placement

Many people who have earned a degree in computers and information systems from King's have flourished in the workforce and in graduate school. Listed below are just a few of the places where our alumni have found success:

- The George Washington University, graduate studies
- Alltel, senior computing analyst
- Blue Cross of Northeast PA, systems engineer
- Little Room Studios, web developer
- Stone Edge Technologies, computer information technologist
- U.S. Postal Service, programmer

### Academic Excellence

A King's education is centered around our nationally recognized core curriculum and challenging major programs, which help students discover and build on their strengths while exploring their interests. An innovative four-year plan of career development across the curriculum helps students focus on finding a job they love and a fulfilling career.

### Supportive

All of our classes are taught by professors (not teaching assistants) and average 18 students, which allows for meaningful interaction with professors. More than 87% of our faculty have a Ph.D. or equivalent terminal degree so students learn from and work with world-renowned faculty members. With over 96% of students receiving financial assistance, King's strives to make it possible for promising students to attend our college.

### Successful

With 99% of King's graduates employed or attending graduate or professional school within six months of graduation, our alumni go on to successful careers. Internships, undergraduate research and study abroad programs offer students the chance to gain experience in their chosen fields. Comprehensive career advisement, on-campus recruitment and a strong alumni network increase job opportunities.
