

NURSING

BACHELOR OF SCIENCE (B.S.)

If you're inspired by helping others, there are few career paths more rewarding than nursing.

Nurses are at the front lines of critical medical care, often having the first and most frequent interactions with patients in need. As healthcare challenges across the country expand, so do employment opportunities for professionals in this field. A career in nursing opens the door to many opportunities in Adult Health, Pediatrics, Obstetrics, Psychiatry, and more.

OPPORTUNITIES AT KING'S COLLEGE

Your success hinges on your ability to think critically and communicate with patients and staff. King's helps you develop these skills through our interdisciplinary approach, which enhances your development with a liberal arts education. Our curriculum also helps students learn the importance of social responsibility and the ability to make informed, ethical decisions. Here is what else makes our program unique:

Cutting-edge facilities: our new Frank and Carolyn Kowalski Center for Advanced Healthcare Education offers pediatric, physical rehabilitation, daily living, and cadaver labs, many of which feature augmented reality technology and 3D imaging and printing services.

1+2+1 Dual Degrees: the only one in the region that makes you eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN) at the end of the third year. As a result, you can jump start your career by working part-time as an RN during your senior year.

Partnership with LCCC: access to our facilities and a variety of clinical settings, including community health agencies, clinics, hospitals, and nursing homes. Students enrolled in our 1+2+1 Dual Degrees in Nursing Program achieved a 100% pass rate on the NCLEX-RN in 2023.

**KING'S
COLLEGE**
TRANSFORMATION. COMMUNITY. HOLY CROSS.

CAREER OPPORTUNITIES

According to the American Nurses Association (ANA), Registered Nurses (RNs) form the backbone of healthcare delivery in the United States. Graduates with a B.S. in nursing learn how to think critically, utilize clinical judgment, develop communication and leadership skills, understand and participate in nursing research, and recognize and address the health needs of global communities. Graduates often find jobs as registered nurses but can also pursue higher education and find careers as:

- nurse anesthetist
- nurse midwife
- nurse practitioner
- nurse educator

DEGREE REQUIREMENTS

Below is a sample of courses offered in this program. For a complete list of programs and courses, see our Degree Requirements online.

BIO 135	Anatomy & Physiology I
BIO 136	Anatomy & Physiology II
ENG 101	English Composition
BIO 251	General Microbiology
CSEM 100	College Seminar
COMM 101	Oral Communications
HCE 101	Holy Cross Experience
NUR 100	Intro to Nursing Profession
HPE 207	Cardiopulmonary Resuscitation
NUR 110	Nursing Concepts I
NUR 120	Nursing Concepts II
Psych 103	General Psychology
PSY 217	Developmental Psychology
MATH 126	Intro to Statistics
NUR 230	Nursing Concepts III
NUR 240	Nursing Concepts IV
NUR 220	Pharmacology / Pathophysiology
NUR 250	Contemp. Concepts in Nursing
PHIL 101	Introduction to Philosophy
SOC 217	The Family
NSG 304	Introduction to Evidenced Based Practice
NSG 306	Informatics for Healthcare Professionals
NSG 400	Community Health
NSG 308	Global Health and Ethical Decision Making
NSG 410	Community Health (Clinical)
NSG 405	Baccalaureate Capstone
NSG 450	Diversity, Equity, and Inclusion
NSG 500	Advanced Physical Assessment

\$93,600
