

PRE-HEALTH

BACHELOR OF SCIENCE (B.S.)

Are you interested in attending medical, dental, veterinary, or similar schools? Pre-health advising is perfect if you're interested in helping people.

Similar to a pre-med major program, we offer a wealth of individual and group opportunities for our students as they progress from freshman year through admittance into their professional program. Faculty advise students on the courses and experiences that will make them a strong candidate for a professional program in the field.

OPPORTUNITIES AT KING'S COLLEGE

In addition to the pre-health advising we offer for a broad range of health professions, we offer 5-year B.S./M.S. programs for students wishing to pursue physician assistant or athletic training careers. These programs are composed of a pre-professional and professional phase. Some other unique features include:

Cutting-edge facilities: the Alley Center for Health Sciences and the Kowalski Center for Advanced Healthcare Education provide outstanding academic, lab, and medical facilities.

Personalized academic experience: small class sizes ensure each student receives individual attention from faculty, fostering a personalized academic journey.

Pathways to success: through job shadowing, internships, and work experience, our students discover their strengths and can confidently choose which area of medicine is for them.

Research opportunities: students will be able to conduct research as early as their first year. By working side-by-side with faculty, students gain research and analytical skills that will set them apart from their peers.

COLLEGE**
TRANSFORMATION. COMMUNITY. HOLY CROSS.

CAREER OPPORTUNITIES

A degree in pre-health prepares students for various options in higher education and beyond. Graduates go on to pursue higher education in medical school, dental school, veterinary school, chiropractic school, optometry, and more.

Our students have been accepted at some of the leading professional programs in the country, including Geisinger Commonwealth School of Medicine, Temple University, University of Pennsylvania, and more. Some potential careers for graduates include:

- audiologist
- physician assistant
- exercise physiologist
- podiatrist

DEGREE REQUIREMENTS

Below are all the courses offered in this program. For a complete list, see our Degree Requirements online.

BIOL 113	Evolution and Diversity with Lab
BIOL 210	Organisms and Their Ecosystems with Lab
BIOL 213	Cell and Molecular Biology with Lab
CHEM 113	General Chemistry I with Lab
CHEM 114	General Chemistry II with Lab
CHEM 241	Organic Chemistry I with Lab
CHEM 242	Organic Chemistry II with Lab
PHYS 111	General Physics I with Lab
PHYS 112	General Physics II with Lab
MATH 125	Calculus

SIMILAR MAJORS

Neuroscience B.S.

Explore the complex neural mechanisms involved in human and animal behavior. Focus on the relationship between behavior and biology at multiple levels in this program.

Physician Assistant B.S.

If you dream of being a doctor, our physician assistant program is a great pathway! Diagnose illnesses, create treatment plans, assist in surgery, and more.

Chemistry B.S.

Explore the elements that make up our world! Whether you're captivated by molecular structures or excited by the vast applications of chemistry across various industries, our curriculum is designed to inspire and challenge you.
