

PSYCHOLOGY

BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.)

Are you curious about the experiences and thoughts that influence how we perceive the world? Your interest could indicate a more than casual curiosity.

Knowledge and appreciation of human interaction are essential for success in our rapidly expanding and diverse society. The study of psychology offers insight into understanding the thoughts, emotions, and actions that shape who we are and explores the dynamics of human interaction.

OPPORTUNITIES AT KING'S COLLEGE

At King's College, we understand that the journey of becoming a skilled and empathetic psychologist is more than just acquiring knowledge. It's also about personalized attention, hands-on experiences, and a supportive community that nurtures growth.

Small class sizes, big opportunities: we're committed to fostering a close-knit learning environment. With an average of just 16 students per class, our professors can provide individual engagement to help foster a deep understanding of the subject matter.

Empowering hands-on learning: psychology is a dynamic field that thrives on real-world application. That's why we provide ample opportunities for hands-on research projects, internships, and experiential learning.

Multiple pathways to success: whether you pursue a B.A. or a B.S. degree, you'll find a curriculum that equips you with a strong foundation in psychology and the necessary skills to excel in your chosen path.

JENNA HAEFELE '24
Criminal Justice & Psychology

"The faculty in the Psychology department went above and beyond to support my growth, both academically and personally. Their mentorship not only deepened my passion for psychological research but also inspired me to pursue a future in clinical practice. I'm incredibly grateful for the impact they've had on my journey."

CAREER OPPORTUNITIES

Our psychology majors find themselves in a diverse array of professional fields, showcasing the flexibility and breadth of knowledge they acquire during their academic pursuits, from counseling and forensic psychology to experimental research and school psychology.

Many of our students go on to pursue clinical and counseling careers in private practice, social work, health care, law enforcement, and teaching. Some job placements include:

- caseworker
- recreational therapist
- rehabilitation counselor
- social worker/counselor

CONCENTRATIONS WITHIN THE MAJOR

- Human Resources
- Clinical Counseling
- Developmental
- Neurobehavioral
- Forensic Psychology

WHAT'S THE DIFFERENCE BETWEEN A B.A. AND B.S.?

The B.A. program is an excellent choice for students who have a passion for understanding human behavior within a broader liberal arts context.

The B.S. program is tailored for students seeking a more in-depth scientific understanding of psychology and a focus on research methodologies.
