General Information

The 3+2 Chemistry-Environmental Engineering Dual Degree Program is a collaboration with Washington University in St. Louis. Students will spend three years at King's College taking mathematics, science, engineering, and general education CORE courses. Eligible students will then transfer to Washington University for two years to complete engineering courses in their chosen field. Upon successful completion of the program, students will receive both a B.S. in Chemistry from King's College and a B.S. in Environmental Engineering from WashU. *(For more information, refer to the college catalog).*

Total Credits earned at King's College = 102

Notes:

* CHEM 471[PR] Advanced Inorganic Chemistry required for the King's degree satisfied by taking CHEM 461 Inorganic Chemistry at Washington University

** CHEM 493[PR] and CHEM 494[PR] Senior Colloquium required for the King's degree satisfied by EECE 404 Environmental Engineering Capstone at Washington University
