Master of Science in Health Care Administration

Summer 2023
Course Offerings - All Courses Online

23/S1: 1st Accelerated Session on-line (May 22, 2023 to June 30, 2023)

Course Number	Semester	Course Title	Faculty
HCA 596 WB	23/S1	Leadership for Quality Management in Healthcare	Mr. Justin Beaupre

HCA 596 - Leadership for Quality Management in Healthcare: This course integrates all the major components covered in the core courses. Students will take the various competencies they have acquired and learn how to apply them to real-life cases involving applications of leadership and quality total management in health care delivery systems. Topics include leadership theories, culture building, relationship management, contingency and transformational theories, communication skills, change management, conflict management, mentorship, and team building. (3 credits)

23/S2: 2nd Accelerated Session on-line (July 5, 2023 to August 11, 2023)

Course Number	Semester	Course Title	Faculty
HCA 511 WB	23/S2	Quantitative Business Methods for Healthcare	Dr. Marc Marchese

HCA 511 - Quantitative Business Methods for Healthcare: This course will provide a comprehensive overview of selected research and quantitative methods used in conducting health services research. The course will address all phases of the research process, from generating research questions and hypotheses, to study design, sampling, measurement, data collection, and data analyses. Proper use of statistical methods and computer applications for secondary data analysis will also be covered. (3 credits)
