

ECONOMICS

Sustainable economic growth. Stubborn unemployment. Debt. These are the headline phrases that have captured your attention, now you're ready to understand them more fully. The economics major at King's College presents an opportunity for you to do that and more. Students who study economics at King's leave college with a deeper sense of the role of the economy in international affairs, domestic politics and everyday life.

What Makes Us Different

Through a flexible curriculum that matches your interests, you can tap the resources of faculty with experience in developing countries around the world, local non-profit organizations, and Ivy League research centers. Course content in the economics curriculum varies from basic principles and theory to quantitative skills and policy analysis. Formats vary from lecture and problem-solving to discussion and experiential learning. In recent

years, economics students at King's have presented research at academic conferences, participated in the National Model United Nations in New York, and earned credit through internships and service-learning projects with local community partners. Though varied in these ways, the economics major at King's, built on a core curriculum in the liberal arts, provides students with a coherent framework for effective decision-making in the workplace, in the community, and at home. According to department chairperson, Dr. Margarita Rose, "What students come to realize is that economics is more than just graphs and numbers. It's a lens through which we can see the world more clearly, no matter where in the world we are."

Working with a faculty that is committed to the professional and personal growth of students, you can choose to couple your economics major with a major or minor in a complementary field. Typically, students with a major in economics

have also pursued a major or minor in international business, finance, accounting, or mathematics. We have also graduated economics students with a second major in philosophy and political science. This path of complementing the economics major with another field of study prepares students well for the particular career they want to pursue.

Placement Highlights

Listed below are just a few of the various job positions, workplaces and graduate schools where our alumni have found success recently.

- Student at Syracuse University School of Law
- Fund Financial Associate at Vanguard
- Graduate student in Economics at the University of Delaware
- Bank examiner for the Comptroller of the Currency
- NAV Ops Accountant at BNY Mellon

Economics (121-122 Credit Hours)

Suggested Sequence

- Use the information below as a guide when selecting courses.
- Consult your Academic Advisor prior to course registration.
- Refer to the King's College Catalog and/or website for course titles and descriptions.
- Choose one course from each CORE category as listed for Economics Majors
 - CORE courses may be taken in any order approved by the academic advisor with the following conditions:
 - CORE 100 and CORE 110 should be taken in the first year.
 - CORE 115 (or 116) should be taken within the first two years.
 - For students selecting a Foreign Language (CORE 14x), every effort should be made to register for that language in the first semester at King's.
