

# PHYSICIAN ASSISTANT STUDIES

**P**As are health care providers who are nationally certified and state licensed to practice medicine. As a part of their responsibilities, PAs perform physical exams, diagnose illnesses, develop and carry out treatment plans, order and interpret lab tests, assist in surgery, provide patient education and prescribe medications. Upon graduation, PAs take a national certification examination developed by the National Commission on Certification of PAs (NCCPA). PAs are employed in virtually all types of health care settings including private offices, clinics and hospitals. PAs can practice in almost any field of medicine including family practice, surgery, pediatrics, psychiatry and orthopedics to name a few.

## PA Studies at King's 5-Year BS/MS Program

King's College offers a 5 year Master of Science Degree Program in Physician Assistant Studies. This program is composed of two parts: a three-year pre-professional phase and a two-year professional phase.

### Pre-Professional Phase

The first three years (six academic semesters) of the 5-year BS/MS Program are considered the pre-professional phase. The pre-professional phase of the PA Program consists of Liberal Arts and PA Classes at King's and the pre-requisite sciences required to enter into the professional phase. Students in the pre-professional phase must meet or exceed the "progression criteria" in order to enter the professional phase of the PA program. Completion of 500 hours of patient care experience, including physician assistant shadowing, is part of the progression criteria. Successful comple-

tion of the written progression criteria allows the student to matriculate into the professional phase. The pre-professional phase is not part of the PA Program's accreditation status awarded by the ARC-PA.

### Professional Phase

The term PA Program refers only to the Professional Phase of the Physician Assistant Program at King's College. The professional phase refers specifically to the full time twenty-four month training program. This program consists of ten and a half months of didactic instruction followed by thirteen and a half months of clinical rotations. Upon completion of this phase, students will graduate with a Master's Degree in Physician Assistant Studies. The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted **Accreditation-Continued** status to the **King's College Physician Assistant Program** sponsored by **King's College**. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA *Standards*. Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the *Standards*. The approx-

imate date for the next validation review of the program by the ARC-PA will be March 2027. The review date is contingent upon continued compliance with the *Accreditation Standards* and ARC-PA policy. The program's accreditation history can be viewed on the ARC-PA website at [arc-pa.org/accreditation/accredited-programs](http://arc-pa.org/accreditation/accredited-programs).

"King's graduated its first PA class in 1977. Our graduates practice medicine in communities across the country", states Diana Easton, Director of the Physician Assistant Studies Program. "Our highly esteemed program provides these communities with competent caring physician assistants through the dedicated work of our faculty and the committed support of our clinical preceptors."

### Placement Highlights

Listed below are just a few of our many alumni who have found success:

- LT Keegan Fees '17, LT Danielle Lisnock '17, and LT Paul Boyer '17, Aerospace Physician Assistants for the US Navy.
- Alexandra Heavilon, '16, Hematology and Oncology, St. Luke's University Health Network in Bethlehem, PA.
- Beth Ann Grega, '16, Cardiac Surgery Team, Johns Hopkins Hospital in Baltimore, MD.
