

Hello Staff and Students,

The COVID-19 dashboard was provided to inform the college campus and the interested public about the known documented cases of COVID-19 among our students and employees during the pandemic. We hope it served as a useful resource for interested parties as we diligently provided information in a timely fashion.

Since we have discontinued routine surveillance testing, we will no longer update the dashboard. If circumstances change that require the reinstatement of testing, we will relaunch the dashboard.

If you are an employee with questions, please contact hr@kings.edu.

If you are a student with questions, please contact studenthealth@kings.edu.

Please remain safe and vigilant in avoiding COVID-19 risk, and remember the best protection is still being up to date with COVID-19 vaccination!

With summer being right around the corner, we also want to make sure employees and students have the resources to obtain COVID-19 tests. Residential households in the U.S. are now eligible for another order of free at-home tests on USPS.com. Each order now includes 8 rapid antigen COVID-19 tests. It is helpful to have these tests on hand if you are exposed to a positive case or feeling ill prior to leaving your house.

Place your order for free at home COVID tests: [COVID-19 Home Tests | USPS](#)

Locate a local testing site near you: [Community-Based Testing Sites for COVID-19 HHS.gov](#)

Have a safe, healthy, and enjoyable summer!
